OBJECTIVE

Cybersecurity graduate (B.S., Magna Cum Laude) and Tri-County Tech–certified computer repair and networking technician with experience imaging and deploying Windows devices, managing virtualized environments, and resolving endpoint issues. Seeking the Advisor I, Client OS Management role to help deliver secure and reliable end-user computing through standardized imaging, automated deployment, and continuous improvement.

TECHNICAL CERTS/SKILLS

- CompTIA A+, Security+, ITF+
- AWS Cloud Practitioner
- Windows imaging, deployment & configuration
- Virtualization (Proxmox) & VM templating
- Endpoint support & troubleshooting
- Scripting & automation: Python, Bash, Ansible
- Network enumeration & infrastructure mapping
- SQL, Java, Microsoft 365

PROFESSIONAL SKILLS

- Communication
- Teamwork
- Problem-solving
- Integrity
- Adaptability
- Trustworthiness
- Motivation

EXPERIENCE

ONEOK, Cybersecurity Intern

Tulsa, OK | May 2026 – Present

- Operated with the enterprise security operations team to build and fine-tune automated (SOAR) processes that enrich analyst data and reduce manual workload.
- Implemented a supporting process to synchronize incident data across SIEM applications, ensuring consistent and accurate response details.

University of Tulsa, Cyber Department Student Employee

Tulsa, OK | Fall 2025 – Spring 2026

- Built and maintained virtualized environments in Proxmox, including automated template creation and deployment that standardized images for fast, repeatable provisioning.
- Served as an escalation point for user issues: diagnosed authentication failures, troubleshot student vm access, and repaired password-reset functionality for the student access system.
- Performed network enumeration and mapping to document infrastructure and help with defining baseline configurations.

Continental Resources, IT Network Intern

Oklahoma City, OK | Summer 2025

- Developed a backup automation system to dynamically discover and back up network routers, improving data availability and recovery.
- Built two automations to detect and report recurring access issues on employee devices, enabling proactive troubleshooting and reducing help-desk volume.

Tri-County Technology Center, IT Intern

Bartlesville, OK | Summers 2023 & 2024

- Imaged, cloned, and deployed Windows PCs and managed Chromebook fleets, supporting end-user computing for staff and classrooms.
- Installed and configured hardware, network cabling, printers (inkjet and 3D), and VR stations; maintained and troubleshot PCs to keep devices reliable.
- Assisted the Technology Coordinator with day-to-day IT operations and end-user support.

EDUCATION

The University of Tulsa – Tulsa, OK

B.S. in Cybersecurity, General Engineering minor — Magna Cum Laude (GPA 3.8/4.0), 2026

Tri-County Technology Center – Bartlesville, OK

Certificate: Computer Repair and Networking (2021–2023)

ACHIEVEMENTS/AWARDS

- Eagle Scout, Boy Scouts of America — January 2022
- FIRST Robotics — Member & Regional Semi-Finalist (2021–2023)
- National Technical Honor Society (2022–2023); National Honor Society (2019–2023)
- Business Professionals of America — Member (2021–2023)
